- Confluence

Professional Experience

Ernst & Young LLP Gurugram
Manager – Financial Services Risk Management August 2021 – Present

- Led functional streams in wholesale credit-risk transformation covering Concentration Risk, Capital Adequacy and RWA calculators; aligned data lineage, eligibility/CRM treatment and parameter inputs (PD/LGD/EAD, maturity) feeding capital engines
- Produced high-quality BRDs/FS for UK/EU regulatory platforms, detailing regulatory calculations, IRB parameter interfaces, monitoring KPIs, and sign-off workflows with Regulatory Reporting teams
- Automated regulatory & risk dashboards in Tableau (portfolio quality, overrides, back-test KPIs, RWA variance), improving transparency and decisioning for Risk & Finance leadership
- Drove model implementation testing with Tech & Product Owners: sourced/validated rating data, performed recons/parallel runs, and documented UAT evidence for go-live approvals
- Supported governance: prepared materials for senior forums (issues logs, remediation plans, use-test artifacts, policy/procedure updates)
- Conducted training on Basel III/IRB and credit-risk management to uplift first-line and reporting teams
- Collaborated closely with Front Office (Sales/Trading/Structuring), Credit Risk, Ops, Finance, and FTB support, driving quick, data-backed decisions under tight timelines
- Commercial impact: contributed to NER growth >5% YoY; ₹2 Cr+ value via scaling teams and repeat delivery

KPMG India Services LLP Mumbai

Consultant – DTI Oracle January 2021 - July 2021

- Functional Development of Return on Capital Adequacy (RCA3) BASEL-III report pertaining to Credit Risk RWA and Capital calculation for one of the largest PSU Bank in India
- Performed Model validation and testing using SQL as per the internal credit risk managementpolicies and regulatory guidelines and migrating them from UAT to Production
- Resolved 80% of UAT defects during model validation, ensuring regulatory guideline compliance.
- Engaged with clients to understand business user problems (BRD), data, system, providing solutions and ensuring compliance with regulatory standards
- Liaised with OFSAA Infrastructure, Database and associated teams for tracking andresolving issues on UAT and Production
- Optimized OFSAA data pipelines, slashing report generation time from 72 to 24 hours
- Engaged business users on BRDs & reconciled data quality/lineage issues driving accurate RWA outcomes

Stradegi Solutions India Pvt Ltd Chennai

Business Analyst – Product Management June 2020 – January 2021

Product Development

- Engaged with management to brainstorm on user requirements, document requirements, business process and solutions for developing the product
- Created and maintaining functional specification, business requirement documents, change request and configuration related documents
- Presented functionality requirements to product team and coordinating the modules development, testing and release
- Writing functional test cases and reviewing the test cases created by testing team
- Involved with design team in designing UI screens and templates
- Involved closely with development team to close defects and change requests
- Configured data models and workflows in pre-UAT, UAT and Production environments and taking ownership of complicated workflows
- Provided functional support to adhoc requirements from various team

Demo Customization

- Defined and configured business process use cases for various prospects in short time period
- Involved with development team to develop demo-specific features
- Tested the demo features and customizations
- Prepared demo data and setting storyline for demo
- Enabled global sales team for hands-on with the customized demo environment

Equitas Small Finance Bank Ltd Chennai
Business Analyst – Branch Banking April 2018 – June 2020

Predictive Modelling

- Collaborated with functional heads to identify opportunities for operational, strategic improvements
- Designed, developed and deployed predictive models using IBM SPSS and Cognos basedon the business requirements
- Used predictive analytics such as machine learning (Decision Trees and Neural Networks) and data mining techniques to forecast propensity of Fixed Deposits with 96% accuracy

Adhoc Analysis

- Analysed RBI regulatory updates on a regular basis
- Prepared assessment dashboard on Flexcube platform to overview & classify transaction details
- Prepared Stress Testing scenarios to analyse impact on assets
- Prepared a report on Prudential Norms - as regulated by RBI
- Prepared a report on Risk Based Supervision to RBI, mapped asset performancesacross geographies
- Prepared a dashboard on assets & excerpts for CRMC

TAB-Banking

- Defined testing (UAT) & release of TAB-Banking in all branches pan-India
- Acknowledged, distinguished asset tagging
- Provided feedback & resolved queries in house
- Coordinated with multiple teams - IT, HR, UAM & Asset Management
- Preparation of BRD

Certifications

- KPMG Lean Six Sigma Green Belt
